

Quick Start Guide: Crammer Study and Sound System

The Crammer handheld connects to your computer to download content and upload your child's [study data](#) to a personalized [LeapFrog Learning Path](#). The Learning Path is a free, online tool that lets you see your child's learning progress with LeapFrog connected products.

1. Set up the Crammer handheld

- Insert three AAA batteries, and then turn on the Crammer handheld (the Home screen will display).

2. Set up your computer

- Connect the Crammer handheld to your computer using the included USB cable.
- Turn on the Crammer handheld.
- An Internet connection is required for the following step:
Windows users: Follow the instructions on the computer to download the installer and install the LeapFrog Connect Application.
- **Mac users:** Open the Crammer Installer on your computer and double-click the installation file. Follow the instructions on the computer to complete the installation of the LeapFrog Connect Application.
- Troubleshooting:
 - **Windows users:** If the installer does not open automatically after downloading, find the installer where you saved it. Open the installer file and follow the instructions to complete the installation: Find the CrammerWebSniffer.exe file on your computer and double-click to open it. If prompted to "run" the Crammer WebSniffer.exe file, click "Run".
 - **Mac users:** Find the CrammerWebSniffer.dmg file on your computer and double-click to open it. Double-click the LeapFrogConnectSetup_Crammer application. Follow the instructions on the computer to complete the installation.
- You can [download the installer](#) at any time from the the Customer Support section on LeapFrog.com. Follow the prompts to download and install the LeapFrog Connect Application for Crammer.
- The LeapFrog Connect Application will open after the installation is complete. Enter a player profile for your child's Crammer handheld when prompted.
- Continue to follow the prompts on your computer screen to complete the setup by creating a LeapFrog account (or signing into your existing account), creating a [footprint](#) for the child who will use the Crammer handheld and linking the player profile to the child's footprint.
- You have now set up the LeapFrog Connect Application to work with the Crammer handheld and created a personal Learning Path for your child.

3. Using the Crammer handheld

- Parents: Connect the Crammer handheld to your computer often to upload your child's study data and access a personalized LeapFrog Learning Path
- Kids: Use the LeapFrog Connect Application to:
 - Create your own digital flash cards
 - Download thousands of free math, social studies, science and language arts quiz questions
 - Import music to listen to on the Crammer handheld
